- Gamasutra "While it's very much a fun experience, it doesn't quite fulfill the fantasy of a battle-tested battlemage, but rather feels more like that of a per-level wizard." - Kotaku "While it's not as deep as Demon's Souls, it succeeds in being uniquely compelling and well-realized." - Metro UK "Elden Ring Full Crack is the first Souls-esque game I've played for quite some time that doesn't feel like it borrowed every concept, mechanic, and motif from the genre. It's a fun, engaging fight for the realm of fantasy." - IGN "The game feels surprisingly polished for a free-to-play title, and the new hardware features work pretty well." - Penny Arcade "In the end, Elden Ring ultimately succeeds on the strength of its unique setting and surprisingly polished combat." - Ars Technica "Elden Ring is an interesting take on the Souls formula, and it looks to be a very fun and exciting game. " - GamingReporter "The combat is brutal and challenging, just as well-tuned as the Souls games, and yet still fresh. The ability to craft weapons and armor gives the game a more involved crafting system than many other games of its type." - IGN "It's the best of both worlds: a polished fighting game with all the action of the Souls series and the level and plot rich storytelling of The Witcher. It's also a pretty fun game to play." - Namco (Spain) "The game has a unique style and a good feeling of progression... at its core it's a special experience." - GamesRadar "Elden Ring game is a Soul-style ARPG (Action RPG) game made by a small game studio and based on an interesting RPG IP. At its core, it is a great game to play, but it also is an important prototype, showing the way of things to come." - Wario64 "It's a fun fantasy-farming RPG about creating your own destiny in a world where nothing is truly yours to take. It's a fascinating concept that runs with no brakes, and is based on a very solid foundation." - GamesTM "Elden Ring is a bff6bb2d33

I am using two different tables and the while loop is determining which table to use and executing all tasks in that table based on that determination. If that table was empty I want to be notified and to continue executing all the tasks in the other table. This is what I have so far:
