HELP!!! After installing the game, while my game file is in offline mode, when I started up the game, a message showed up in the top left saying something along the lines of "New file downloaded, additional updates to install". I clicked the button to install, however, when i did that, a black screen was shown, and nothing else happened. I just want to play the game and didn't care about the patches. I thought I would just have to reinstall the game, which is no big deal, but this has happened twice to me now. I figured out how to fix it the first time, so after that I went onto the server, ran into the box I re-played the main scenario before I saved, and bought a new character, and logged in to the site I found my MCM file on, however the last message on that site was around a year ago, and was about the 5th-6th patch. So I assume the site doesn't work anymore. I got the saved file from that old saved game and copied it into my save-folder, as well as the box file that was on the server, but it shows that no box exists. So any thoughts on how I can fix this? I really want to play this game, but I just don't want to lose my progress. Help is very appreciated. Heres the fixed save file. If you need it let me know. 1. Right click your character and click Export. 2. Go to your save folder. 3. Extract the savefile you just saved with the source code. 4. Place the extract into the folder with your source code. 5. Go to your start menu and click Run as Administrator. 6. Save a couple of screenshots for proof. 7. When you run your game. You will see the message: "There are new versions available for the following updates... Then click it and it will start downloading it. 8. When it finishes it will say: "New file downloaded" and it will automatically install the updates for you. Hope this helps!ReplyDelete King of Combo21 I keep getting stuck on a wall that I cant walk around... Any ideas?ReplyDelete adamk39 I bought the game last week and have been playing it for the last two weeks. Never had the problem. Uninstalled in my Steam folder then reinstalled an the game works bff6bb2d33
