

Fondamenti Di Chimica Schiavello Palmisano Download [Extra Quality] Pdf

The course counts 9 CFUs (one CFU, University Credits equals one ECTS credit and represents the workload of a student during educational activities aimed at passing the exams), which corresponds to 78 hours of lectures and laboratories. The didactic activities alternate frontal lessons and laboratories, the latter carried out in the final part of the course. During the frontal lessons, the course topics are proposed from the theoretical point of view and illustrated with examples and exercises. During the training in the lab, which is aimed to put into practice the acquired theoretical knowledge, the students conduct personally the experiments, in order to acquire the necessary dexterity within the safety rules of the chemical lab. The attendance to at least 80% of the scheduled laboratories (with the delivering of the report due), is a necessary condition to take the final exam. The slides and notes used to support the lessons will be uploaded to the Ely Platform in agreement with the sequence of the arguments of the scheduled lectures. The download of this material is possible only for on-line registered students. Roberto Palmisano born on 1948, received the doctor degree in Chemistry from the University of Palermo (Italy) in 1975 cum laude. Since 2001, he is full professor of chemistry at the Department of Chemistry in the University of Palermo, Faculty of Pharmacy and Technology. His main field of interest is the chemistry of the organic compounds, in particular, his works have been focused on the photochemistry and chemiluminescence of these compounds, both natural and synthetic, organic photochemistry of bioactive compounds, the kinetics of chemiluminescence, and photochemistry of colloidal and solid solutions. He has been invited to National and International Conferences as lecturer and member of various Scientific or Editorial Committees. He is consultant of the Italian Ministry of Defense.
