And with it, they will be able to showcase some truly beautiful work. Not only for themselves, but for others as well. There are a wide variety of new tools available to use in Photoshop. So there is a lot of what we call the 'everyday common use.' For instance, there is the ability to use the background eraser and the magic wand tool. These allow us to quickly erase unwanted parts of our image. This is great if we are working on cleaning up our image, but also if we are just creating some of our own design work. So on that note, the book will mostly focus on taking our images, and adding to them, or enhancing them, or both of these things. But with this said, it's important to also use our time wisely. While working, we will also utilize the various tools to produce some of the thing we wanted to produce. Perhaps we wanted to create something like this image:
